YOUR RESPONSIBILITIES:

- **Autonomous Steering:** Play a pivotal role in shaping the controlling of development projects, optimizing processes, and enhancing transparency, measurability, and manageability of performance and output.
- **Value Enhancement:** Take charge of significantly increasing the value creation of internal and external development services.
- **Visionary Concept Implementation:** Collaborate in interdisciplinary and global teams to develop and implement avant-garde approaches, especially in product and investment controlling, holistic business cases, and licensing strategies.
- **Analytical Brilliance:** Your precise data analysis and key performance indicator tracking provide the foundation for targeted, cost-conscious management decisions.
- **Strategic Planning Expertise:** Collaborate with stakeholders from development and management levels to steer short and long-term personnel and cost strategies for developer teams worldwide.
- **Optimization and Value Enhancement:** With a keen eye for detail, identify cost drivers and potentials, initiate optimization measures, and achieve outstanding efficiency improvements.
- **International Collaboration Excellence:** Act as a central interface in international teamwork, be the go-to sparring partner for development and management teams, and represent controlling excellence in development projects.

YOUR PROFILE – A BLEND OF EXPERTISE & CHARISMA:

- Completed degree in Business Administration/Industrial Engineering with a focus on Finance, Controlling, Product Development, or Project Management.
- Several years of experience and deep knowledge in R&D Controlling within an international corporate environment.
- Profound understanding of processes related to product developments, customer-specific project developments, and the creation and maintenance of business cases and licensing models.
- Proficient in data analysis and forecasting, with professional knowledge in using MS Power BI, SAP, and JIRA.
- Fluent in English for team communication and at least B2 level proficiency in German.
- Agile mindset with the ability to operate independently as well as synergistically within teams.
- Exceptional communication skills, capable of persuading at both micro and macro levels.
- Precise, structured, and independent working style, combined with strong interdisciplinary thinking and a passion for collaborating with international development teams.
- Strategic thinking coupled with a hands-on mentality. You possess the ability to think outside the box, make long-term strategic decisions, and are eager to actively implement them in daily business.

WHAT YOU CAN EXPECT:

- **Work-Life-Balance:** Look forward to flexible, family-oriented working hours, home office options and our childcare allowance
- **Good catering:** Discover the varied food on offer in our modern company restaurant
- **Structured induction and buddy system:** We want you to feel comfortable right from the start and be able to contribute your expertise directly
- **Personnel development and training programs:** Develop yourself continuously so that you can always give your team new impetus
- **Lots of appreciation:** attractive remuneration is just as much a matter of course for us as a collegial working relationship at eye level
